

# My Emissions

When it comes to reducing our impact on the environment, small changes can make a big difference. That's why we're delighted to introduce carbon emissions ratings across our Camile menus to help you, our guests, make more informed choices.

We have partnered with My Emissions to calculate each dish based on its water consumption, storage and transport and developed an A-E rating scale based on Carbon intensity 'A' for low impact and 'E' very high. So now you can enjoy our delicious taste with a little less waste!

## Starters
