

SHOWCASE

RECONVERT PROJECT

**THU NIGHT 16 MAY
00:15 – 00:45**

WORM

(Boomgaardsstraat 71)

The concept of percussion has been altered significantly by the evolution of the instrument. The methods of the reConvert project are unique and dedicated to changing the face of the percussionist world, by working actively with composers such as Georges Aperghis, Simon Steen-Andersen, Michael Maierhof and Jorge Sánchez-Chiong and premiering over a dozen works written to help train emerging young composers. The reConvert philosophy is based on the re-examination of the aesthetic use of percussion instruments, where musical discourse is analysed and adapted to their creative needs. With numerous works using unconventional instruments and staging, a whole new experience is created for the listener.
