

ICON Airbrick Vent

Technical Data Sheet

10/2024

PRODUCT

PRODUCT DETAILS

Colour	Buff, Terracotta, Grey, Black, Brown, White
Code	IAB93, IAB96, IAB99

Equivalent Area	6170mm ² per 9x3 brick vent unit
Size	215mm long x 69mm high x 60mm wide
Material	Injection moulded polypropylene

USES

- In conjunction with the telescopic underfloor ventilator system to provide ventilation below suspended timber floors.
- To provide ventilation through external walls to the building interior.
- Used in conjunction with straight through cavity wall sleeve.

FEATURES & BENEFITS

- Equivalent area of 6170mm² per 9x3 air brick
- Front grille designed to reduce the entry of wind driven rain
- Dovetail connection allows multiple airbricks to be stacked to form 9x6 and 9x9 sizes.
- Available in wide range of colours to match various brick types, buff, terracotta, black, brown and white, anthracite in packs of 20
- Very tough and robust
- Durable and totally resistant to decay
- External cowl available to fit over airbrick and reduce wind and noise levels.
- Manufactured by injection moulding in UV stabilised polypropylene

Installation

- Always use in conjunction with ICON telescopic or straight through cavity wall sleeves.
- Remove 9x3 standard brick and replace with air-brick.
