

Technical Data Sheet

Fresh TL98E Wall Vent

PRODUCT

INSTALLATION

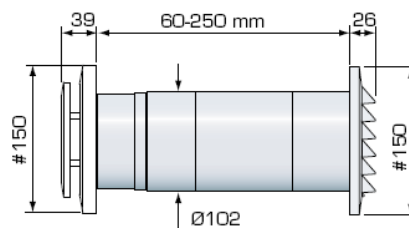

- Place vent as high as possible at least 10cm below ceiling, preferably above radiator
- Check for services before drilling
- Use core drill with minimum dim $\varnothing 102\text{mm}$
- Drill hole so pipe slopes slightly downwards
- If wall thickness is less than 300mm pipe can be cut to required length, if over additional pipes may be required
- Seal pipe both inside and outside with a suitable sealant agent
- Mechanically fix external grille into place
- Remove internal vent housing and fix with 4 screws
- Attached front cover and check vent is fully operational
- Wash filter 1-2 times per year.

FEATURES & BENEFITS

- Economy wall vent for quick and simple ventilation
- Supplied with standard dust and insect filter
- Front cover mounted on internal grille and includes condensation shield
- Airflow and direction are adjusted with the front cap
- Easy to clean and install
- Telescopic pipe for flexibility
- Wide range of storm and Allergy filter accessories available
