

# PROTECTIVE FILMS

## Hard Surfaces

Jan 2026

### ROLL SIZE

Length	Width	Coverage	Box Quantity
25m	600mm	15m <sup>2</sup>	9 rolls per box
100m	600mm	60m <sup>2</sup>	6 rolls per box

### USES

Multi-purpose temporary protection film for hard surfaces on construction, renovation, manufacturing and event planning projects.

### FEATURES & BENEFITS

- Protects against foot traffic, equipment and debris
- Waterproof and protects against spillages
- Reverse wound for easy application
- One person easy application for single use only
- Ideal protection for painting and decorating
- Easily removed after use
- Suitable for a variety of floors including hardwoods, tiles (ceramic, porcelain & stone), vinyl, laminate, concrete and epoxy coated floors
- Colour of Hard Surface film - red

### USERS INFORMATION

- Remove film from surface before 30 days. Failure to remove film may cause damage to the finished surface
- If exposed to extreme conditions, such as sunlight, high temperatures or heavy traffic the protection film should be inspected weekly and replaced if required.
- It is always advisable to test the product in a small area prior to rolling out on the surface. The user should monitor the test area for 48hrs before proceeding.
- Do not use on surfaces that are not fully cured.
- Do not use on glass, natural marble or stone, carpet, damp surfaces or unfinished wood.
- Operating temperatures +5°C to 25°C
- Store at room temperature one day before use.
- Not recommended to use with underfloor heating.
- The surface should be clean and dry prior to installation of the film.
