

MEV Range

CMX-Multi MEV range

PRODUCT

USES

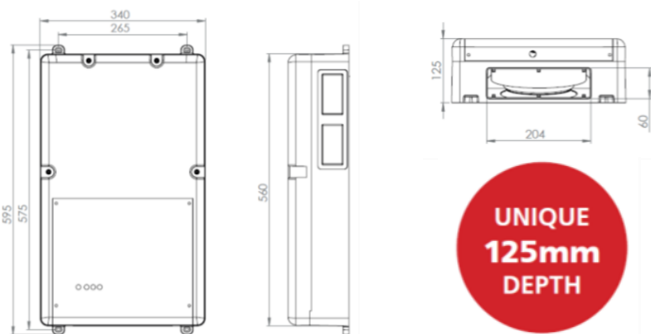

Aimed at the residential market its shape and size conform with new build restrictions whilst also making it ideal for retro-fit projects to direct runs and wall or ceiling void fixings. Quiet running with impressive airflow rates.

FEATURES & BENEFITS

- Excellent specific fan power as low as 0.14 (Wl/s)
- CMX-MULTI-H has integral humidistat.
- 3 inlet spigot for simplified multi-room extraction
- 204x60 spigot allowing direct duct runs from the unit, saving time and money on site
- Exceptional compact (125mm deep) and lightweight (3.1kg) ideal for small ceiling voids depths.

SIZES & PERFORMANCE

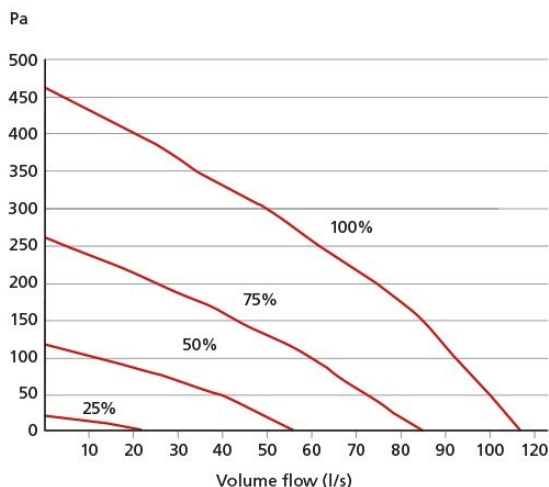

HOW IT WORKS

Waste air is released to the atmosphere

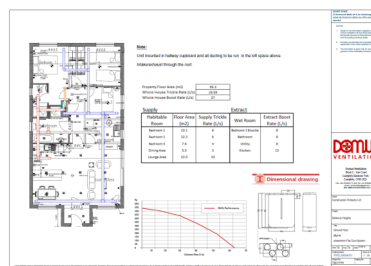

Moisture laden air is continuously extracted from wet rooms such as kitchens, bathrooms and utility areas. This prevents potential for condensation and stale air odours.

Performance – 3 open outlets

DESIGN SERVICE

MVHR & MEV

A dedicated in-house design and technical team offering a range of services including AutoCAD duct layout and advice on the correct MVHR
