

HRXE-AURA Range

Mechanical Ventilation with Heat Recovery (MVHR)

Nov 23

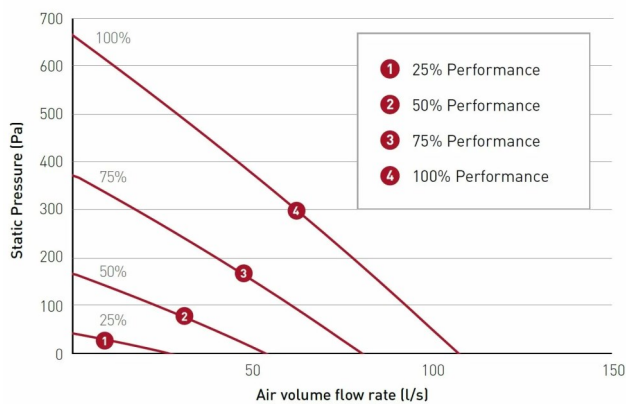

A highly intelligent and lightweight MVHR unit, the HRXE-AURA offers superior performance coupled with easy installation and user operation.

FEATURES & BENEFITS

- The heat exchanger block can recover up to 95% of the normally wasted heat.
- Two independent fans have full-speed control for background and boost ventilation
- Summer by-pass function. Automatically activating in warmer months to ensure the property is well ventilated
- Designed with 100% automatic bypass and due to intelligent design no reduction in airflow when operating in bypass mode resulting in enhanced performance
- Designed to provide optimised balanced (supply & extract) mechanical ventilation with heat recovery
- Weight 24kg
- Listed on Sap Product Database (PCDB)

Performance & Dimensions

Front Elevation	624mm Height x 657mm Wide
Side Elevation	624mm Height x 431mm Wide
Top View	4 x 150mm diameter outlet 458x227mm center of outlet
Spigot connection	4 x 150mm Ø
