## Radial Ducting System

April 2020

### PRODUCT

75mm diameter strong corrugated  
Radial ducting system.

### PRODUCT DETAILS

Radial ducting systems are a clever plug and play whole house ventilation solution, which uses manifold distribution to evenly service each room through semi rigid duct. Radial ducting can be up to 60% quicker to install and have performance levels that are in excess of traditional ducting systems.

Simplified design layout makes the system ideal for new or refurb projects.

Accessories for the Radial ducting include Duct clips, Manifolds, Fire stopping sleeves, adaptors for rectangular ducting, blanking caps and protective caps.

Tested by the Building Research Establishment (BRE) for inclusion in -  
Product Characteristics Database (PCDB)

Code	Description	Size
RDD75(25)	Semi Rigid Duct	Ø75mm x 25m coil
RDD75	Semi Rigid Duct	Ø75mm x 50m coil
