USES

Solar Cable Outlet kit creates a watertight seal around cables which pass through the roof. Use in conjunction with the Sealing Collar to create wind and airtight seal around the penetration.

FEATURES & BENEFITS

- Provides watertight lead through for cables which pass through the roof
- 8 cable insert allow additional cables to be added
- Foam strip and sealing bar provides perfect barrier against driving rain
- Available in 3 colours to match roof finish
- Slate or tile cable kit available

Areas of Application

- Various types of cable example PV-systems, sensor cables, antenna cables, lights, security cameras.
- Cables with a diameter of 4-8mm
- Roof pitches between 20° to 50°
- Suitable for most popular concrete interlocking & plain roof tiles
- Separate outlet available for all slate roofs
