

Venduct Solar Thermal Outlet

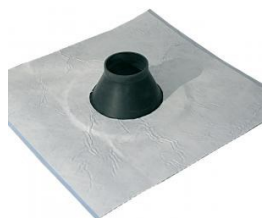

Technical Data Sheet

PRODUCT

PRODUCT DETAILS

Dimensions	Nozzle & Collar: 120mm high x 350mm long x 120mm wide Universal Base Tile: 425x450mm (inc Skirt) Slate Base: 400x400mm
Material	UV resistant Soft & Rigid PVC Nozzle: EPDM Sealing Collar - with silicon release paper & EPDM collar
Colour	Brown : 0247 Red: 0100 Slate Grey: 0429 Slate Version (Black): 0400

Sealing collar highly recommended to maintain weather tightness around pipe penetration in roof underlay.

Available in following sizes;
8-12mm; 15-22mm; 25-32mm
42-55mm; 50-70mm

USES

The Venduct Solar Thermal Outlet is the optimum solution for the installation of solar energy pipes and photovoltaic system cables through the roof. Due to its unique shape in combination with an elastic EPDM sealing collar the penetration has a watertight fit and protects the roof structure from water damage.

FEATURES & BENEFITS

- Provides watertight penetration of solar pipes through combination with an elastic EPDM collar
- Made with special UV resistant PVC
- EPDM collar heat-resistant up to 100°C
- Air and wind tight connection
- Easy installation
- Available in 3 colours to match roof finish
- Slate or tile kit available

Areas of Application

- Application for pipe outlets
- Application for pipe diameters of 10 to 70mm
- Application for roof pitches 16° to 65°
- Suitable for most popular concrete interlocking & plain roof tiles
- Separate outlet available for all slate roofs
