

AHOY FUTURE CAPTAINS!

Have you ever dreamed of creating the ships of tomorrow? Join this exciting contest and design your very own Ship of the Future! Use your imagination, crafting skills, and creativity to think about what makes your ship special. On this sheet you will find the instructions, have fun!

STEP 1

INVENT YOUR SHIP

What is your ship for?

Is it a passenger ship, to transport stuff or to generate energy? Or is it a ship working for a better environment? Nothing is too crazy, it's your idea that counts.

What does your ship look like?

Is it big or small? Does it have a special shape, like an animal, an airplane or a spaceship? Use colors, patterns and materials to make your ship unique.

How does your ship move forward?

Does it use sails, solar panels, wind power or futuristic technology like magnets? Think of ways that are good for the environment

Sketch

Make a sketch of all your ideas and think about what you want to make later. Anything is possible; a drawing, from Lego, cardboard or whatever materials you like to work with.

STEP 2

CREATE

Time to bring your ideas to life. How you do this is entirely up to you. Good luck!

STEP 3

SUBMIT

To enter the competition, take a photo of your design. Send it to mumsel@aegirmarine.com stating your name, age and contact details. Every designer will receive a nice prize, nice of you to join!
