

Sensoneo received prestigious environmental award Golden Ant

Bratislava, 24th of November, 2016

Sensoneo, a leading provider of smart enterprise-grade waste management solutions, was honored with prestigious environmental award Golden Ant. The award was delivered during the annual “Waste Industry Day” event.

Sensoneo has been awarded with “Slovak green Oscar”. The Jury consisting of the waste management professionals, experts and scientists voted for winners in 5 different categories. Sensoneo smart waste management solution that enables to cost-efficiently manage the waste lifecycle, improve the environment and well-being of people, became winner in category “Best innovative solution in waste industry of 2016”.

“Waste Industry Day” is regular annual event that connects waste professionals, experts, entrepreneurs, companies and scientists from the waste industry area. Golden Ant awards is dedicated for individuals and companies with remarkable results in waste industry, who have participated on development of exceptional waste related solutions or managed to achieve remarkable positive results with big change potential.

“We see the award as appreciation and validation of advisability of our solution. Besides the cost saving effect and process optimization, Sensoneo also brings great benefit for the environment that is freed from the effects of unnecessary carbon emissions and noise annoyance. We feel very honored to receive this award and thank to everyone who appreciated the benefits that Sensoneo brings,” said Martin Basila, Founder of Sensoneo.

Sensoneo is a global enterprise-grade smart waste management solution provider that enables cities and businesses to manage their waste cost-efficiently, be more environmentally responsible and improve the well-being of people.

Through its unique smart waste management technology, Sensoneo is redefining the way waste is managed. The solution combines unique ultrasonic Smart Sensors (Single, Double, Quatro and patent-pending Micro-sensors) that monitor waste real-time with sophisticated software (Smart Analytics, Smart Route Planning and Smart Waste Management System) providing cities and businesses with data-driven decision making, and optimization of waste collection routes, frequencies and vehicle load. This results in overall waste collection cost reduction of at least 30% and carbon emission reduction up to 60% in cities.

Sensoneo smart waste management has attracted cities and business around the world and the solution is installed

in numerous locations across Europe, North America, South America, Middle East, Australia and New Zealand. For more information about how Sensoneo can help you manage your waste smarter, please visit www.sensoneo.com.
